

1509B412T17 CE/EN14195 DIN181 C 100 1 = 3

Electrical control panel with teal faceplate and clear plastic bag covering the top section. The panel is mounted on a wooden wall. The teal faceplate features several control elements, including three vertical indicator lights or switches in the upper section and a larger control area in the lower section. A clear plastic bag is draped over the top portion of the panel, obscuring some details. Below the teal section, there are more control elements, including a red emergency stop button and a yellow emergency stop button. The panel is secured to the wall with yellow screws.
